Figure 1. A schematic diagram of the experimental setup. The subject is seated in a chair, viewing a video screen. The screen displays a target (a small circle) and a starting point (a larger circle). The subject's hand is positioned at the starting point. The distance between the starting point and the target is labeled as d . The subject is instructed to move their hand from the starting point to the target. The video screen is connected to a computer system, which records the hand's position and movement time. The computer system is also connected to a motor unit, which provides feedback to the subject's hand. The motor unit is connected to a force transducer, which measures the force exerted by the hand. The force transducer is connected to a data acquisition system, which records the force data. The data acquisition system is connected to a computer system, which processes the data and provides feedback to the subject's hand. The computer system is also connected to a motor unit, which provides feedback to the subject's hand. The motor unit is connected to a force transducer, which measures the force exerted by the hand. The force transducer is connected to a data acquisition system, which records the force data. The data acquisition system is connected to a computer system, which processes the data and provides feedback to the subject's hand.
